When is the online stat entry going to be set up for this season?

It's something that's on my list, I just haven't had time to work on it yet.

The programming shouldn't be too tough:

- 1) Database backend that remembers team members
- 2) Entry form that allows entry of stats and removal/addition of team members
- 3) Format an email and send it off to the statistician

If you or someone you know has experience with either PHP or perl programming please let me know.

So, basically just need to set up like a SQL database. Set that up that has records for each team and for each team member and then formatting the data to send to the statician?
